FREE international webinar exploring the potential for arts-based teaching methods in healthcare education and staff development in the UK and abroad.

21st March 2024, 3pm - 4pm (GMT)
Online (Zoom)
Register via Eventbrite
Closed captioning will be available

Join us to explore the powerful role that drama, dance, photography, visual arts and music can play in supporting medical students, healthcare professionals and the communities they serve.

Looking at examples from our recent projects, you will be introduced to a variety of ways in which the arts can enhance health education and help our communities build sustainable and compassionate healthcare systems.

This international webinar is an opportunity to bring together healthcare professionals, artists, researchers and policymakers interested in how the arts can improve healthcare.

Speakers:

Professor Suzy Willson (Professor of Movement, Arts & Medicine at Queen Mary University of London, Artistic Director of performance company Clod Ensemble and their Performing Medicine initiative)

Professor Paul Heritage (Professor of Drama and Performance at Queen Mary University of London, and Director of People's Palace Projects)

Performing Medicine has been delivering creative training programmes for healthcare professionals for over 20 years. This webinar will give an overview and share insights from our latest research programme - Communicating Through Covid.

People's Palace Projects is an arts research centre that brings together artists, activists, academics and audiences to challenge social, health and climate injustices through the power of the arts - in the UK, Brazil and beyond.
